Stainless steel pliers tray - Standard

*Safe and easy to clean*

**Description**

ROCKMED Matrix cassettes are made of long-lasting, low-maintenance stainless steel. Soft, colored silicone rails securely hold instruments throughout the processing cycle. Available in over 6 different sizes, configurations and color options, and can be specialized to meet your needs.

**Features & Benefits**

Ergonomic latch with positive locking mechanism allows for single-handed opening and visual confirmation that the cassette is locked. Hole pattern creates 30% additional open area for more access during cleaning and sterilization.

Compatible with current cleaning equipment, including automated washers. Innovative silicone rail system reduces instrument contact by up to 59% allowing for more water flow while protecting and holding instruments in place. High quality, electropolished stainless steel protects against corrosion while providing a professional appearance. Beveled edge allows for a more ergonomic grasp. Smooth, round corners and slotted edges promote drainage and drying.

# Plastic Sterilization Tray

Plastic trays are sterilizable by all standard methods of sterilization. Check Trays are designed to encase instruments during processing. Safe for all standard sterilization methods. Autoclave/dry heat up to 360 °F, ETO, and Cold Solutions.

Check Flexibility of layout. Finger-tip mats and "plug-in" inserts available for individual instruments.

Check Unique, "grid" system in all bases, trays, and lids makes it easy to install mats or inserts to protect your instruments.

Check Stackable. Integral feet on bases and corner ridges on lids allow for easier handling in autoclaves and storage.

Check All bases have pebble-like surface to prevent mats from sticking.

Check Single- and double-level trays to handle different instrument quantities. Double-level trays come with a removable upper-level insert and mat.

Check Tray dimensions designed to accommodate a variety of instrument sizes and shapes.

Check Guarantee product strength, structural integrity, and extended life cycle.

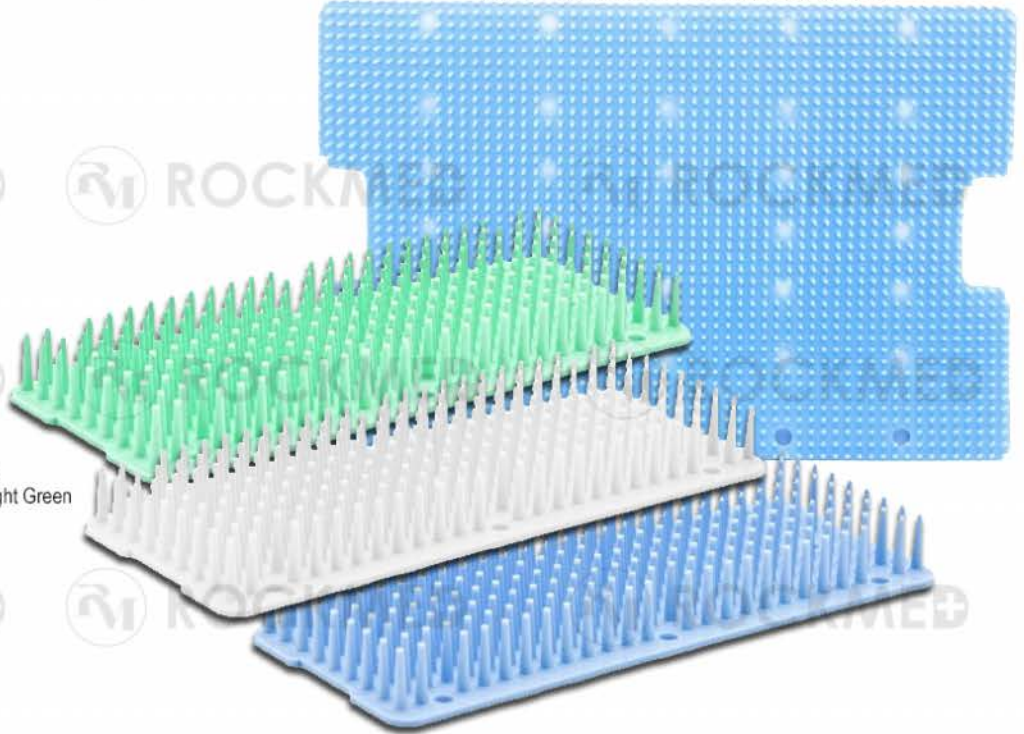

Enhanced features include a slotted lid and raised node base surface to facilitate the circulation of steam and aid in drying.

Silicone mat for use with instrument sterilization trays

- Cassette for 5
- Cassette for 7
- Cassette for 10
- Cassette for 15
- Cassette for 20

The Core benefit of our Mesh Sterilization Cassette over the normal Metal Sheet Cassette is that the Sterilization Detergent Spray Stream reaches all the Instruments easily and cleans the Instruments perfectly.

EASY CLIP has a fixed, hinged, locking arm, so it can never leave the cassette ! Moving the arm fully back opens the cassette for easy placement and access of instruments. then a simple click and your instruments are held in place securely. Made of stainless steel and silicone, eaSy CLIPS are electropolished to give a bright shiny surface finish. eaSy CLIPS can be used in all washer disinfectors and ultrasonic baths with all known solutions, and then sterilized at 134° unwrapped pouched or in a full hospital wrap.

ENDO CASSETTE WITH STERIMETER Holds **48** Files

Teflon, Holds 48 Files

Endodontic instrument holder, cleaning, decontamination and sterilization holder, with a graduated scale (1 to 10) for counting the number of sterilizations performed (as well as the number of uses of the instrumental sequence).

**Properties:**

- Newly designed Endo Cassette with sterimeter is made of high-strength materials: stainless steel and Teflon.
- It has a system for measuring the working length of the instruments.
- The lid has a locking system. Easy lock-on cover secures instruments in container.
- It can store 48 files / instruments (classical instrumentation or nickel-titanium).
- It resists all modes of decontamination.
- It can be placed directly in the ultrasonic box.
- The preservation of the sterilization is allowed by the bagging of the endo box.
- Holds 48 Files, Size: 6.5 x 4.5 x 5 CM
